Portfolio: <https://swhachey.github.io/swhachey-portfolio-webdev/>

Objective

Achieve the ideal through the real. Full stack developer with a proven track record of being self motivated and goal oriented. My specialty and experience is in management and I am very capable of leading a team both in person or via alternative forms of communication. I have a certificate in Full Stack Web Development from University of Denver Coding Bootcamp and 10 years management experience. Resourceful and efficient problem solver who gets the work done without need for supervision. Passionate about coding and app development. Bring a positive mindset to any project I find myself working.

Technical Skills

HTML5, CSS, ES6 + Javascript, Nodejs, Bootstrap and many other frameworks, API query, npm

Projects

Cobras Meal Planner | <https://github.com/CodingCobrasCoding/CobrasCalorieCounter>

Simply choose an ingredient or meal idea and we will populate 5 recipe options. Choose one and get caloric info and recipe info. Then select which day you'd like it to be added to and it will show up on your calendar accordion. Fill up your week and then email yourself the plan.

Weather Forecast App | <https://github.com/swhachey/weather-planning-app-swh>

Insert a city and get the daily and weekly forecast. We even save your previous searched to reference.

Password Generator | <https://github.com/swhachey/swhachey-password-generator>

This feature or app will generate a random password based on your responses to the prompts.
